DIGITAL COMPOSITOR SUMMARY

With proven focus and experience in the field, my motivation is to offer companies key skills required to Composite on Feature Film and TV Productions. Delivering shots on time efficiently whilst communicating with the team, I would like to work on interesting Productions, with leading Visual Effects companies. Career progression in mind from Mid to Senior Compositor my potential and commitment to the role is unshakable.

Academically I am a high achiever gaining results from GCSE to an MA excelling in all the subjects relevant to my chosen profession. Obtaining a merit from the NCCA I went on to work for six of the most Internationally acclaimed Visual Effects companies in Soho London. Earning my position as Junior Compositor by working in Roto and Prep, my progression has been steady and I have learnt key skills on Production i.e. Keying and CGI Integration, that can be a value asset to future employers.

From Camera through to Compositing I have a good knowledge of the whole Production Pipeline, being fortunate enough to work on some brilliant Productions, I have learnt the principles of Film from on set through to postproduction. I listen well to instruction and guidance but use my own initiative when appropriate. Under pressure I am calm, creating win-win relationships within the given time space which can be both challenging and rewarding.

Moving forward I would like to Composite for Feature Film or TV on Productions that inspire people delivering shots and sequences that I can be proud of as an artist.
